Query Details:

Analysis Type:	Portfolio Analysis
Time Horizon:	10 years
Risk Profile:	Moderate

Portfolio Overview

Asset Type	Asset Name	Weight	Risk
Equity_etf	Spy	40.0%	Medium
Equity_etf	Qqq	20.0%	Medium
Bond_etf	Agg	30.0%	Medium
Commodity_etf	Gld	10.0%	Medium

Portfolio Projection

This forecast shows how your portfolio may perform over time. The lines represent different possible scenarios based on historical returns and volatility.

Projection Statistics

Mean Final Value:	\$538,119.46
Median Final Value:	\$467,346.48
90% Confidence Range:	\$197,747.29 to \$1,102,215.57

Risk Analysis

Tail Risk Metrics

These metrics quantify potential losses in adverse scenarios. Value at Risk (VaR) represents the minimum loss in the worst 5% of scenarios, while Conditional VaR represents the average loss in those worst scenarios.

Risk Metric	Value (\$)	% of Portfolio
Value at Risk (95% confidence)	\$0.00	0.0%
Conditional VaR (95% confidence)	\$0.00	0.0%
Worst Case Loss	\$45,057.37	0.0%

Risk Contribution by Asset

This analysis shows how each asset contributes to the overall portfolio risk. A well-diversified portfolio typically distributes risk more evenly across assets.

Scenario Analysis

Scenario: Economic Recession

Broad economic downturn affecting all asset classes

Projected Impact

In this scenario, your portfolio's projected return could change by -0.0% and your Value at Risk (VaR) could change by -2.0%.

Recovery Analysis

In this scenario, 99.9% of simulated paths recover to their initial value, with an average recovery time of 5.2 months.

Loss Threshold	Baseline	Scenario	Difference
Any Loss	0.2%	0.1%	-0.0%

10% Loss	0.1%	0.1%	0.0%
25% Loss	0.0%	0.0%	0.0%

Recommendations

Based on our analysis, we offer the following recommendations for your portfolio. These are suggestions to consider as part of your overall investment strategy.

1. Diversification Strategy

Based on your portfolio composition, we recommend increasing diversification to reduce concentration risk.

2. Risk Management

Consider adjusting your asset allocation to better align with your risk profile.

3. Scenario Preparedness

Your portfolio shows vulnerability to recession scenarios. Consider adding defensive assets for better protection.

4. Tax Efficiency

Rebalancing your portfolio could enhance tax efficiency and improve long-term returns.

Disclaimer

This report is for informational purposes only and does not constitute investment advice. Past performance is not indicative of future results. Investing involves risk, including the possible loss of principal. Diversification does not ensure a profit or protect against a loss in a declining market.

The projections or other information generated by this report regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results, and are not guarantees of future results. Actual results may vary significantly.
